

Addressing NCDs in Humanitarian Settings – Phase II

NCDs or non-communicable diseases are the most common cause of deaths and disability and account for 73% of deaths globally. It is the largest yet mostly underfunded global health issue.

20%

increase (on the average) in patient utilization was recorded across all 15 LGUs was recorded after the establishment of the NCD corners

63%

of Hypertensive Patients achieved good BP control

85%

of diabetic patients achieved good control of their blood sugar

95%

NCD Club members reported with some type of physical activity in a week

Phase I

The first phase of the “Addressing Non-Communicable Diseases in Humanitarian Settings” project with Abbott catered to **2,025 displaced patients in Marawi City shelter camps in 2019*** and **16,534 patients across 15 municipalities with hypertension and diabetes mellitus*** in Lanao del Sur in 2021.

By the end of the 18-month implementation period, the project achieved significant results in increasing the ability of patients to improve their well-being despite their displacement.

*Figures are lifted from 2019 and 2021 baseline surveys.

Phase II- Sustainability

In 2022, CARE in partnership with Abbott, will continue the campaign against NCDs by focusing on its sustainability through the local health system of Marawi City and Lanao del Sur province.

Goal

The local health system in Marawi assumes the implementation and management of the project model to ensure its sustainability.

Objectives

Strengthening the health system's delivery of quality NCD services through training and support to frontline health workers

Establishing data systems to efficiently monitor and manage NCDs

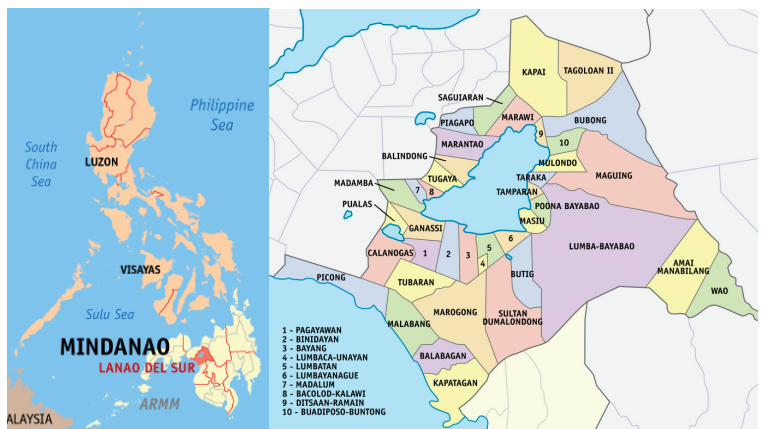

through building more efficient patient data monitoring and reporting systems at primary care levels

Regional, National dissemination and advocacy through institutionalization of the NCD-LOVE model to support and strengthen the Philippines' national NCD program

Project Areas

14 municipalities, 1 city

Camps/Transitory sites in Marawi City

Marantao, Mulondo, Bubong, Butig, Buadipuso-buntong, Picong, Marogong, Calanog, Pualas, Tugaya, Sultan Dumlondong, Lumba Bayabao, Ganassi, and Tamparan municipalities

Addressing Non-Communicable Diseases in Humanitarian Settings- Bridge Year

(Diabetes, Hypertension and Obesity)

Limit food portion (salt and fats)
